

NOTES

Depth is shell height - measured from the top of the shell down to the base.
Shallow end 1130 deep.
Deep end 1840 deep.
The floor is a layered profile rather than one slope, so it works for paddling at one end and laps at the other.
A side-entry step, plus dual cascade steps either side of the shallow end, is the easy way in for children and grandparents.
A triangular seat in the deep end gives you somewhere to pause.

Water line (internal) 9000 x 4400 | outer shell 9396 x 4788 | all dims mm
